(57)Abstract:

PROBLEM TO BE SOLVED: To obtain the subject dermal external preparation for controlling decomposition of desmosome in the skin by including a cholesterol sulfate.

SOLUTION: This external composition is obtained by including a cholesterol sulfate (cholesterol 3-sulfate ester) derived from a living body or partially or totally synthesized at approximately 0.005 to 20 wt.%, based on the whole composition, preferably 0.5 to 5 wt.%, for lotion, cream or the like, and further including a diluent or aid (alcohol, water, chelating agent, urea, surfactant or the like) which is commonly used for cosmetics and external medicines.
